CARPORT FEATURES:

MANY CONFIGURATIONS POSSIBLE

Our team is happy assist you with design services. Get started online at: mtsolar.us/carports

TILT ADJUSTMENT

Tilt changes are a snap with our patented hand-crank adjustable tilt mechanism. This makes for easy cleaning or snow removal. Easily tilts from 5-90 degrees while standing on the ground.

PATENTED HOISTING SYSTEM

Install racking and modules at ground level, then raise array to eye level for wiring, and finally to the top of the pole for completion. Chain hoist and lifting bracket required.

RUGGED DESIGN

Built for high wind and high snow loads when necessary. Use our online calculator to determine pole size and frame duty suitable for your site.

ENGINEERING ASSISTANCE

Complimentary in-house design help with live engineering checks. Stamped drawings are available for all 50 states at an additional cost.

GUTTERS

We recommend contacting a local installer for a seamless gutter.

PRODUCT WARRANTY

10 years

MADE IN USA

Montana is not only the namesake of our company, it's where we build your mounts.
